

# Group Management MIB

draft-ietf-magma-mgmd-mib-04.txt

Julian Chesterfield

IETF 62 – MAGMA WG

# Current Status

- Removed RowStatus ReadCreate functionality from cache tables
  - complexities in interaction between external access and system state
- Clarified router and host table functionality for device implementation
- Updated variable access fields for RFC 1902 compliance
- Typos and spelling changes

# Next Steps

- Solve a few Smilint errors
- Submission to IESG
