I E T F 6 3  
P A R I S • 3 A U G 0 5

# RECAP

- ✱ NEMO working group formed in late 2002
- ✱ Goal of WG was:
  - ✱ Design a basic support protocol
  - ✱ Investigate Route Optimization
  - ✱ Some related documents (MIB, PD..)
  - ✱ Recharter to address route optimization, if appropriate

# RECAP (2)

- ✻ So far, we have achieved:
  - ✻ Designed basic support protocol (RFC3963)
  - ✻ Investigated RO - partially complete
  - ✻ Related work such as multihoming and prefix delegation, partially complete

# UPDATED MILESTONES

## Goals and Milestones:

- Done Submit terminology and requirements documents (for Basic support).
- Done Submit NEMO Basic Support to IESG
- Done Submit WG draft -00 on Threat Analysis and Security Requirements for NEMO.
- Done Submit WG draft -00 on Multihoming Problem Statement
- Done Submit WG draft -00 on NEMO Basic Support Usages
- Aug 05 Submit Terminology as Informational to IESG
- Aug 05 Submit Goals and Requirements as Informational to IESG
- Done Submit WG draft -00 on Prefix Delegation for NEMO
- Done Submit WG draft -00 on MIB for NEMO Basic Support
- Aug 05 Submit WG draft -00 on Analysis of the Solution Space for Route Optimization
- Nov 05 Shut down or recharter the WG to solve route optimization

# QUESTIONS FOR IETF64

- ✻ Most milestones will be complete by the next meeting; charter is due for an update
- ✻ What part of RO (if any) is needed?
- ✻ Should an item be added for multihoming?
- ✻ What other topics are important to address for Network Mobility?
- ✻ Should these be tackled in NEMO?  
MONAMI6? MOBOPTS?
