

IPv6 Transition/Co-existence Security Overview

draft-ietf-v6ops-security-overview-02

Elwyn Davies
Suresh Krishnan
Pekka Savola

IETF-63, Paris, 1 August 2005

Status

- Finished WG Last Call 20 June 2005 on version -00
- Small number of substantive comments (from ~3 people)
- Version 01 fixed all comments but s4.2 was subsequently criticized
 - Not really about security issues
- Version 02 remedied this
 - And fixed up some acknowledgement wording

Summary of Main Changes

- Removed details of ICMPv6 filtering (new draft created)
- Old section 4.2 (Enabling IPv6 by Default Reduces Usability) replaced
 - New 4.2 is just a note on faulty DNS implementations
 - Pieces on web site consequences and VRRPv6 moved to section 4.1
- Added section 2.1.11.1 on Router Advert security
- Plus a number of editorial changes

Next steps

- Document ready for IETF Last Call
