

Hash Based Addresses (HBA) draft-ietf-shim6-hba-01

Presented by Geoff Huston/Kurt Erik Lindqvist

Slides by Marcelo Bagnulo

IETF 64

DNS considerations

- Added a new section about DNS considerations (Brian's comment)
 - HBA addresses have special info in the iid
 - They can have any prefix
 - Depending on the prefix used, they can/cannot be published in the DNS, as any other address with the same prefix
