NOKIA
Convergence of devices and Internet services

The Vision of Internet Communications & Media

Voice has gone mobile and cellular devices constantly introduce richer communications & media features

Also Internet communication is going mobile and new devices are needed to fulfill the emerging market needs

NOKIA

Multiradio connectivity

Convergence Products @ Nokia

- **Convergence Products (CP)** unit is an essential part of Nokia Multimedia BG strategy and **focuses on delivering first-class mobile internet experiences**

- The buzz-word **"convergence"** can be interpreted in many ways. The meaning of the term is…

  - Convergence of devices (e.g. smartphones), services (triple-play) and technologies (multiradio)

  - Convergence of broadband & internet services (data, communications, media)

  - → Creating the **need for easy, fast & convenient portable devices optimized for IP-based services**

Our Rebel Alliance takes on the Empire

NOKIA

Long Live Open Source! The Nokia 770 Internet Tablet

- The **whole web** in a portable, easy and elegant device

- High resolution (800*480) touch screen display

- **New SW platform based on Linux**, support for application developers

NOKIA

Like the Internet Itself, the Tablet Will Evolve

Portal services – in frequent use

Broadband entertainment – mobile

SIP phone – multimedia comms

IPTV – home interoperability

- Next SW release, the 2006 OS edition, will support more Internet communications functionality such as VoIP and Instant Messaging

- The first edition purchases are upgradeable to the 2006 SW edition

HOWTO: Porting an existing application

PDF

- Introduction
- Application File Structure
  - Gaim directory tree
  - autogen.sh
- User Interface Changes
  - src/Makefile.am
  - src/gtkdialogs.h
  - src/main.c
  - src/account.c
  - src/gtkaccount.c
  - src/gtkblist.c
  - src/gtkconn.c
  - src/gtkconv.c
  - src/gtkprefs.c
  - Screenshots of the changes
- Networking Changes
  - src/gaim.sh
  - src/Makefile.am
- Other Changes
  - src/util.c
  - configure.ac
- Adding to Menu
- Application Packaging

Why did you just give me 10 minutes of your life?

- To justify my position in the company

- To understand that we believe in the long term evolution of Internet Services

- That we will do everything we can to encourage the Open Source community to innovate and hopefully utilize our equipment to redefine the Internet

- Share our view of the digitalization of content (and therefore the portability and IP transmission)

Thank You

NOKIA
