Jabbering

- WG participants (usually ~8) “met” ~6 times in the DKIM jabber room to process issues raised on the mailing list (and recorded in the tracker)
 - Operating according to “NOTE WELL” etc.
 - Jabber logs and synopsis of issue dispositions posted to list for confirmation
 - <http://www3.ietf.org/meetings/ietf-logs/dkim/>
 - Look for links to bigger files
- Result: significant speed-up resolving issues
- Plan is to continue this to finish base and with subsequent document
- Questions/Comments?
