Connection Latching Status

- Been away from editing it since IETF68

- Need to fold in discussion from mailing list in April and from IETF68

- Issues – see next slide

Connection Latching Status: Issues

- BYPASS OR PROT vs. PROT IF REQUESTED
- Describe conn latching, template entries as automated PAD/SPD editing
- Canon model of PAD/SPD needed
  - ordered, non-de-correlated; edit, de-correlate, inst.
- Describe privilege
  - insertion points; recommend only two
- Explain how RFC4301 security not undermined
  - Automated PAD/SPD editing + privilege
