

# ISMS IETF73

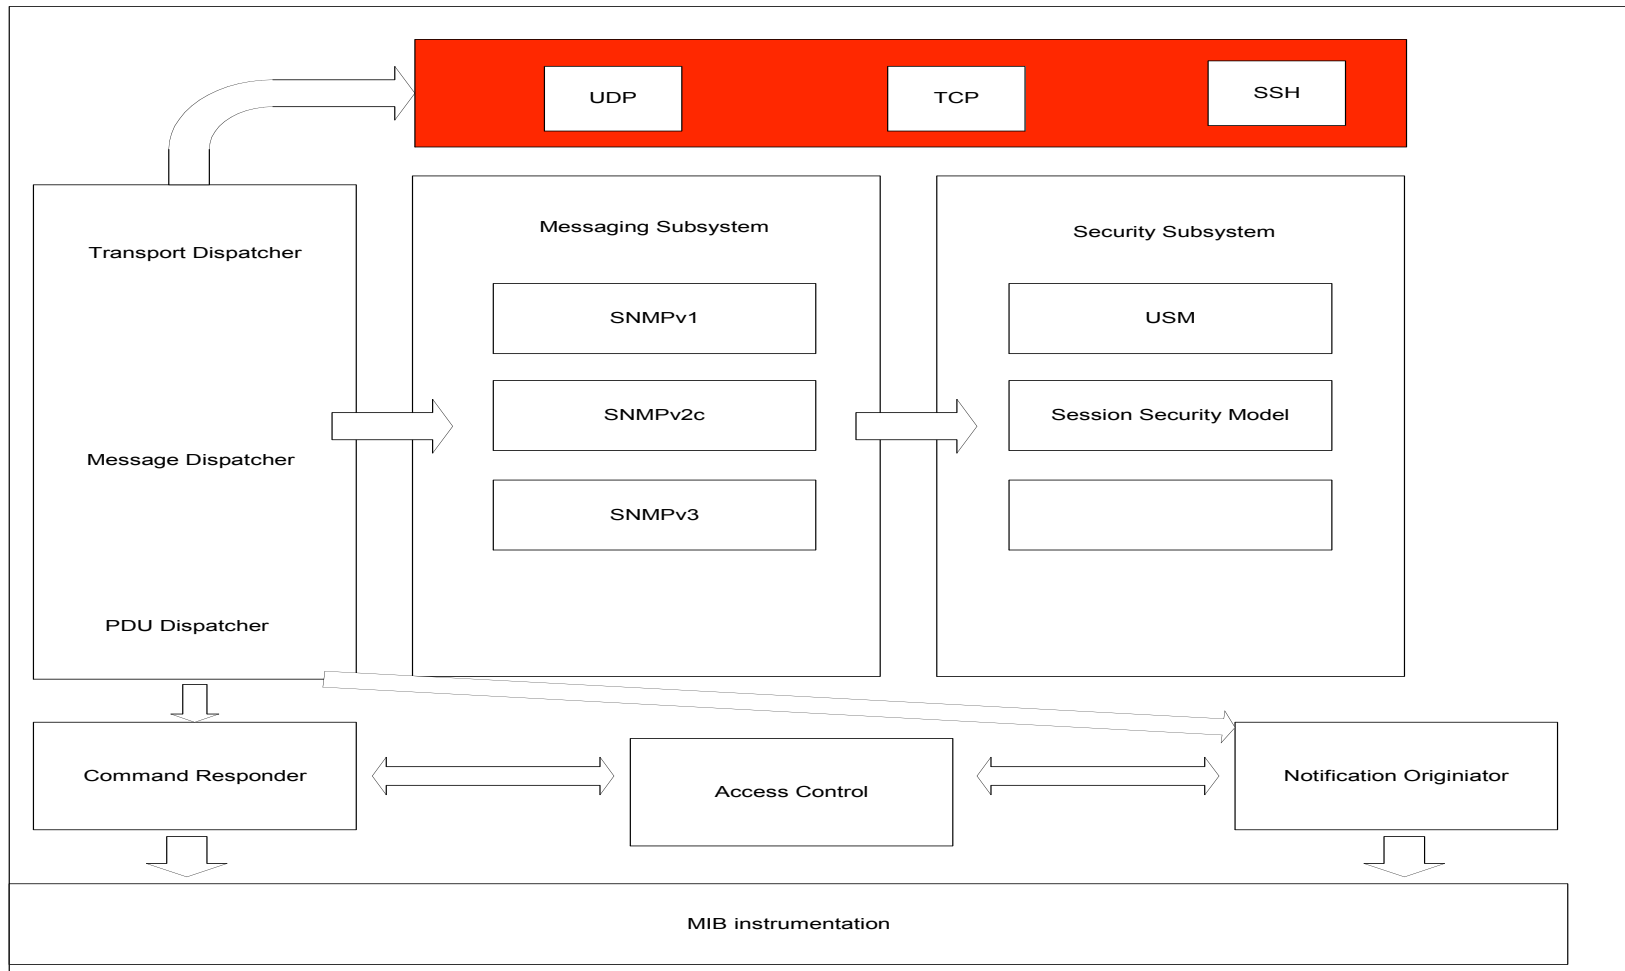

David Harrington

# Status IETF73

## WG Last Call:

- [draft-ietf-isms-tmsm-15.txt](#)
- [draft-ietf-isms-transport-security-model-10.txt](#)
- [draft-ietf-isms-secshell-13.txt](#)
- Added Wes Hardaker as editor

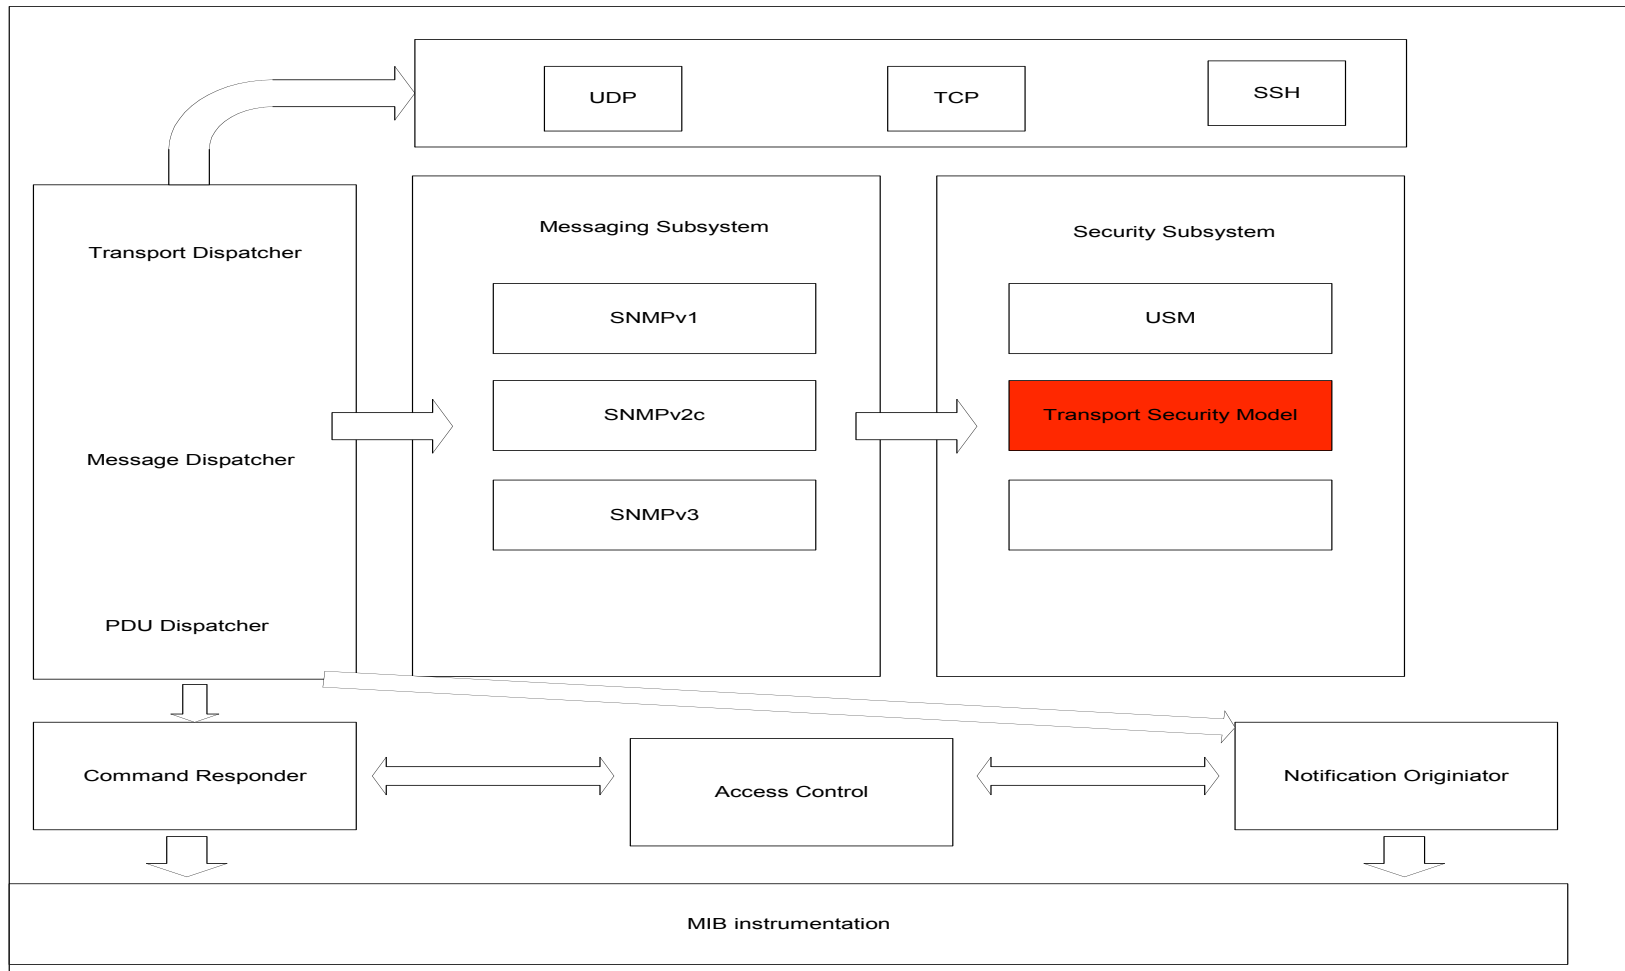

# Transport Subsystem

# Transport Subsystem

- [draft-ietf-isms-tmsm-15.txt](#)
- IANA registry for transportDomains and prefixes
- Require prefix for new transportDomains

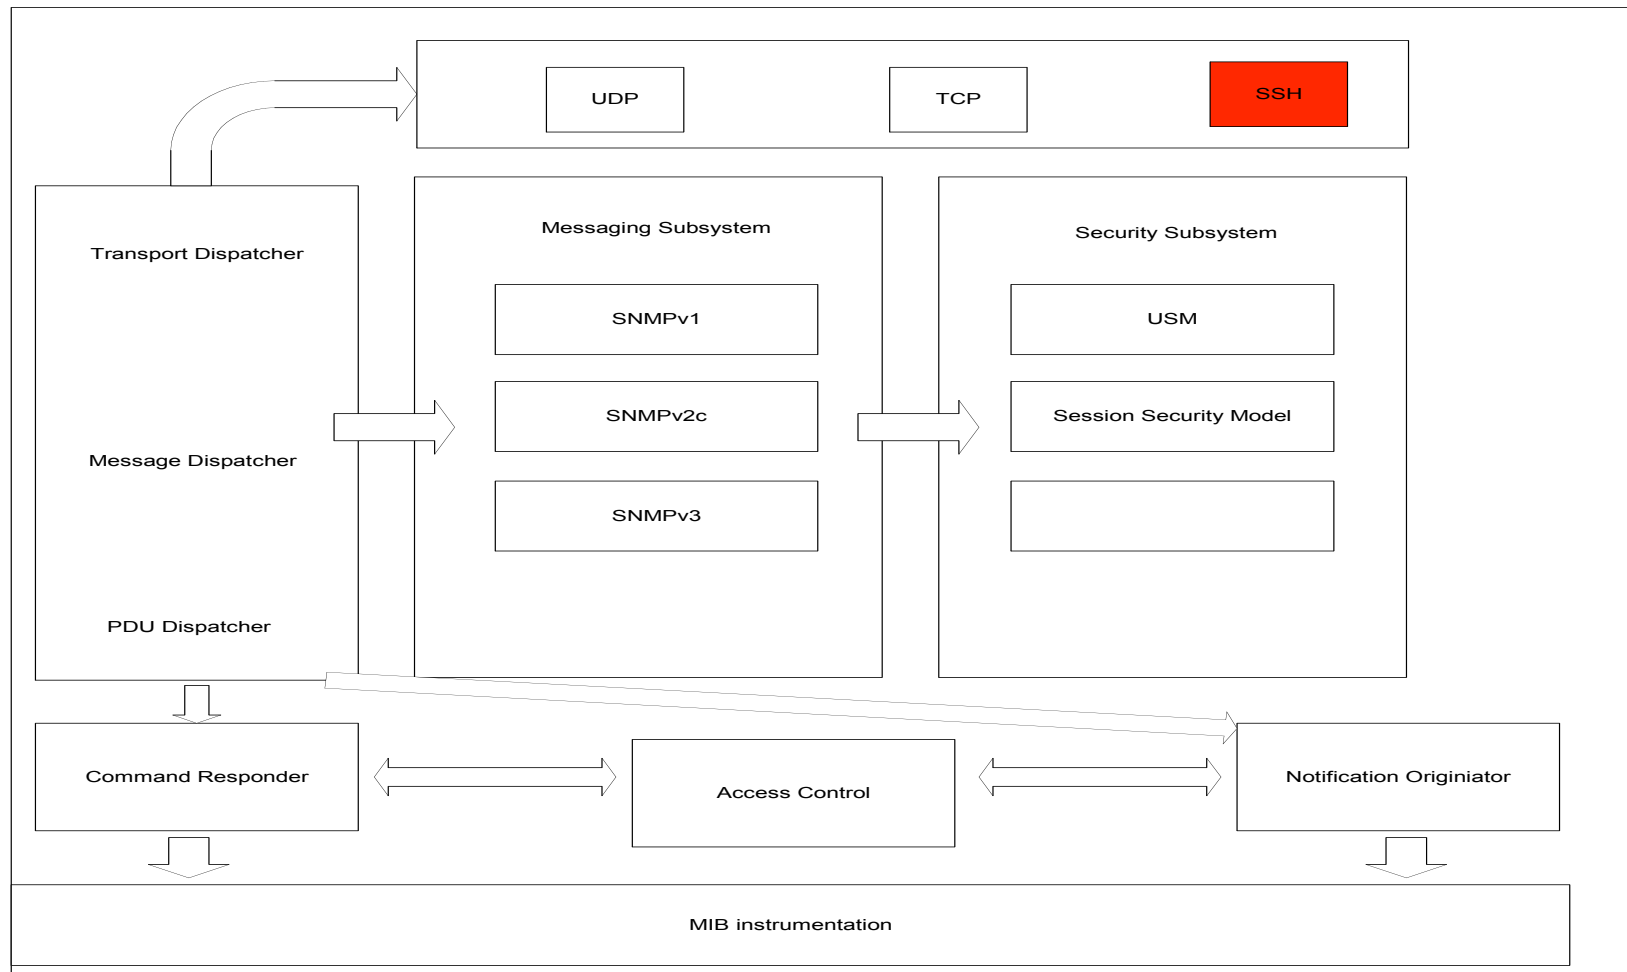

# Transport Security Model

# Transport Security Model

- [draft-ietf-isms-transport-security-model-10.txt](#)
- Prefixes make securityName to tmSecurityName mapping predictable and unique
- Added prefix-enable and error counters to MIB
- Removed transport-disable and transforms
- Removed LCD Table from TSM-MIB
- Editorial and organizational changes for consistency across ISMS documents

# SSH Transport Model

# SSH Transport Model

- [draft-ietf-isms-secshell-13.txt](#)
- Server and client authn procedures
- Removed LCD Table from SSHTM-MIB
- Added user@ to SnmpSSHAddress
- Clarified mappings from SSH user-name to tmSecurityName for predictability
- Editorial and organizational changes for consistency across ISMS documents
