draft-ietf-pcn-marking-behaviour-04
(Standards track)

Philip Eardley

Stockholm, IETF-75, 27 July 09

Since last ietf

- WG LC & IETF LC & Area reviews
- 2 new versions
- Now in IESG
- Various re-phrasings for clarity, for example:
  - "Packet size independent (excess-traffic-)marking": clarified its SHOULD status, example algorithm in Appendix A now does it, added info on 'functionally equivalent'
  - renamed from "marking" to "metering and marking" (throughout)
  - added 'common capsule' summary of PCN to Introduction and removed extraneous material
  - replaced the term 'traffic conditioning' by 'dropping' (throughout)
  - S2.3, 2.4 & Appendix A: altered some of the abbreviations, for better consistency with approach of RFC2698.
  - the ACKs section improved
