Flow Bindings v04

draft-ietf-mext-flow-binding-04.txt
George Tsirtsis
Hesham(ed.), Nicolas, Gerardo, Koojana

November 2009 IETF-76 (Hiroshima)

WGLC

- Many detailed reviews received
 - Thanks to all of the reviewers
- No major issues identified
- A lot of editorial corrections
- A lot of useful clarifications

Main Diff $v03 \rightarrow v04$

- Formalized better the FID sub-options definition
 - Added section of generic format of sub-options
 - Introduced PAD1 and PADN sub-options
 - Cleaned up alignment requirements for all suboptions (as well options)
- Added TS Format byte in Traffic Selector suboption
 - Better separation of this draft from future TS-drafts

```

Main Diff $v03 \rightarrow v04$

- Formalized requirement for unique FID-PRI per flow binding as per WG request
- Clarified descriptions for
 - MN considerations on sending/receiving various options/suboptions in BUs/BAs
 - Mobility Agents receiving, processing and responding to options/sub-options in BUs/BAs
- Added section on Returning Home rules to clarify relationship with RFC5648
- Packet processing clarifications
 - Clarified rules for packets that do not match flow bindings are forwarded to BID with lowest BID-PRI
 - Suggested that fragments of a given packet should be forwarded to same CoA if possible

Main Diff $v03 \rightarrow v04$

- Cleaned up remnants of v02 when we still had a PRO field
- Updated all references to RFC5555 and RFC5648
- Tighten up terminology section
 - Flow, Traffic Selector, Flow Binding, Flow Identifier
- Updated and cleaned up Status codes for FID option
- Wrote detailed IANA considerations section
- Many more editorial and small changes

Ready for IESG?
