

RFC 5280 Clarifications and Implementation Report

David Cooper

RFC 5280 Update

- draft-cooper-pkix-rfc5280-clarifications-00.txt
- Changes encoding rules for explicitText field of userNotice policy qualifier:
 - SHOULD UTF8String, MAY ~~IA5String~~ VisibleString
 - Some mail list discussion on whether BMPString should be added as a "MAY":
 - SHOULD UTF8String, MAY ~~IA5String~~ VisibleString or BMPString
- Added clarification on processing of internationalized domain name labels in a domainComponent attribute.

RFC 5280 Implementation Report

- `draft-cooper-pkix-rfc5280-impl-report-00.txt`
- Needs to be updated to refer to `draft-cooper-pkix-rfc5280-clarifications-xx.txt`
- Some mail list discussion about lack of support for Section 7 internationalization rules
