Implementation Updates

Ulrich Herberg
Justin Dean

"Mini-Interop"

- Ulrich's network emulator (JOLSRv2) sending 30 HELLOS each advertising 30 two-hop neighbors (i.e. 900 routers) to NRL NHDP

    - http://cs.itd.nrl.navy.mil/work/nhdp/index.php

- Both implementations operating on Mac OS X

    - Multi-interface support on Mac is lacking

- Successful test, parsing correct, expiration of tuples worked

Next Steps

- Testing both implementations on CORE
  - http://cs.itd.nrl.navy.mil/work/core/index.php
