

# IMIX Genome

Al Morton

March 2011

`draft-morton-bmwg-imix-genome-01`

# Additional Tests with Variable Packet Sizes

- ◆ Fixed Packet/Frame Size tests are currently required in RFC 2544, etc.
- ◆ IF variable size testing is needed,
  - Fully Specified
  - Repeatability? How Important?
  - Generally Specified if repeating sequence is too long for human comprehension (fraction, or number of frames@size for each size)

# Scope and Spec

- ◆ Exact Sequence specification method
- ◆ No Standard IMIX!!!
- ◆ IMIX-aaafg has:  
64,64,64,1280,1518
- ◆ Also, frequency of a size

Size, bytes	Code Letter
64	a
128	b
256	c
512	d
1024	e
1280	f
1518	g
MTU	h

# Feedback

- ◆ Draft is useful, MTU size is useful
- ◆ Cite the original studies – for methodology
- ◆ Added Specification of fully Custom IMIX possibility
- ◆ Keeping Spec beyond fractions
  - #frames at each size
- ◆ Mostly, this is a reporting spec
