Agenda

- Draft Update
- Next Steps

Status

- Methodology
  - Updated to 06 version on ID
  - Addressed comments by WG up to date
  - Updated to 06 version on ID

- Addressed comments by WG up to date
  - Mostly updated wording in the introduction
  - Terminology

Outstanding Questions

- How to define the traffic mix
- How to define a single protocol within the mix
- Should it be updatable
- How do we define security
  -
- Malformed traffic
  - How to define
  - Leave it out?
- Have I convinced that totally repeatable is not necessary for meaningful results

Next Steps

formal input from the WG

- •Work left to do
- Define more specifically the traffic mix
  - Make decisions on exploit and malformed traffic
  - Make decisions on exploit and malformed traffic
  - Finalize drafts
