Upcoming changes to draft-ietf-websec-origin

Adam Barth

Plan for draft-ietf-websec-origin

- Merge in Principles of Origin
  - High-level description of the "same-origin" policy
  - Complements "nuts and bolts" in current draft
  - First draft available: draft-abarth-principles-of-origin
- Explain scope of draft better
  - Which user agents should care about same-origin?
  - Descriptive or prescriptive?
- Add privacy and security considerations sections
  - Please send ideas to the list
  - Plan is to write and add to draft soon!
- Otherwise seems stable
  - Mostly it's just what we've been doing for 10 years
