draft-ietf-geopriv-local-civic-02

Brian Rosen, Neustar
James Winterbottom, Commscope
Martin Thomson, Commscope
Richard Barnes, BBN
Robins George, Huawei

Reminder of what this does

- Defines the way to extend PIDF

- New namespaces, which was always a way to do it

- Provides a way to use DHCP without new numeric CAtypes

- Incorporates Street Type/House Number prefixes, "Milepost" and "Pole Number" extensions

Updates in this version

- Adds registry and "Type" for implementation suggestion
  - Type A = SHOULD implement
  - Type B = MAY implement

Ready for Working Group Last Call

- No open issues

- No unresolved comments

- What are we waiting for?
