

TICTOC WG

Transporting PTP Messages (1588)
over MPLS Networks

draft-ietf-tictoc-1588overmpls

Manav Bhatia, Alcatel-Lucent

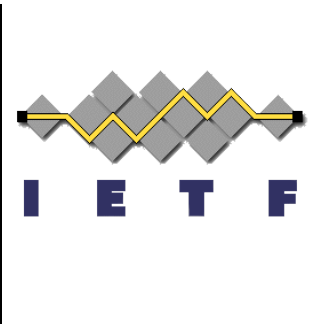

IETF 82, Taipei

Changes in -02

- Revised the draft based on the comments that we received on the mailing list
 - Fixed the Terminology section
 - Removed Entropy Label
 - Removed 1588 over pure MPLS mode (i.e. 1588 packet without an IP/UDP or ethernet headers)
 - Removed the part about distributing PW labels
 - Can take this up as a different draft
 - General cleanup

Next Steps

- Should send this to the OSPF and IS-IS working groups for their feedback on the IGP extensions that we have defined
- Should send this to MPLS WG for their feedback
- Is the draft ready for WG LC?
