

RTCP for Inter-Destination Media Synchronization (IDMS)

draft-ietf-avtcore-idms-03

Ray van Brandenburg, TNO

Hans Stokking, TNO

Oskar van Deventer, TNO

Fernando Boronat, Universidad Politecnica de Valencia

Mario Montagud, Universidad Politecnica de Valencia

Kevin Gross, AVA Networks

Clock Source signalling

- For higher accuracy, IDMS recommends synchronized clocks
- Previous version of draft included section on SDP Clock Source signalling
- During Taipei meeting -> proposal to place Clock Source stuff in separate draft, to increase modularity
 - draft-williams-avtcore-clksrc-00

Clock Source signalling - 2

- -03 of IDMS draft references draft-williams-avtcore-clksrc-00 as normative reference
 - Although Clock Source signalling is optional
- This does risk delaying IDMS work

Other recent work on the draft

- Clarified IDMS terminology
- Dealing with leap seconds clarified
- Document clean-up
