# Note Well

- Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:
  - The IETF plenary session
  - The IESG, or any member thereof on behalf of the IESG
  - Any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices
  - Any IETF working group or portion thereof
  - Any Birds of a Feather (BOF) session
  - The IAB or any member thereof on behalf of the IAB
  - The RFC Editor or the Internet-Drafts function
- All IETF Contributions are subject to the rules of [RFC 5378](#) and [RFC 3979](#) (updated by [RFC 4879](#)).
- Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice.
- Please consult [RFC 5378](#) and [RFC 3979](#) for details.
- A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.
- A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

# Agenda

- Chairs:
- Keith Drage
- Magnus Westerlund
- (Note we will invite the PAYLOAD chairs to join us at the front when we get to the PAYLOAD drafts)
- 15 (15:20 - 15:35) Agenda bash; working group draft status; future work
  - Chairs
- 5 (15:35 - 15:40) IEEE 1588/802.1AS Synchronisation for RTP Streams
  - Aidan Williams draft-williams-avtext-avbsync-02
- 30 (15:40 - 16:10) Codec Operation Point RTCP Extension
  - Bo Burman draft-westerlund-avtext-codec-operation-point-00
- [As PAYLOAD working group]
- 10 (16:10 - 16:20) RTP Payload Format for High Efficiency Video Coding
  - Thomas Schierl draft-schierl-payload-rtp-h265-00
- 10 (16:20 - 16:30) Offer/Answer Considerations for G.723 Annex A and G.729 Annex B
  - Muthu A M. Perumal draft-muthu-payload-offer-answer-g723-g729-00
- 10 (16:30 - 16:40) G.711.0 Compression Segments
  - Michael Ramalho draft-ramalho-g7110-segments-00
- (16:40 - 17:00 Unallocated)

# Status

- Published (December 2011)
  - RFC 6464: A Real-time Transport Protocol (RTP) Header Extension for Client-to-Mixer Audio Level Indication
  - RFC 6465: A Real-time Transport Protocol (RTP) Header Extension for Mixer-to-Client Audio Level Indication
    - IPR disclosure has been made against draft-ivov-avt-slic-04 in <https://datatracker.ietf.org/ipr/1660/> which was a predecessor of this document; a declaration has not been made against the RFC or the working group group draft. The chairs plan to take no action unless such a declaration is made
- In working group last call (Ends 3<sup>rd</sup> April 2012)
  - draft-ietf-avtext-rams-scenarios-03
    - SDP directorate comments
  - draft-ietf-avtext-splicing-for-rtp-07

# Status

- Working group documents
  - draft-ietf-avtext-multiple-clock-rates-02
    - New editor required. 3 volunteers. Have selected Glen Zorn. We thank the other volunteers for their interest. We also thank Marc for the work he has performed so far.
    - Input from Marc: No information on proprietary stack was received, so the code source of FOSS stacks was examined to find the algorithms used (libccrtp, libmediastreamer0, libpjmedia, Android RTP). Because all the stack analyzed used the nonmonotonic algorithm, this algorithm was added back to the spec.
