

IEEE 1588/802.1AS Synchronisation for RTP Streams [draft-williams-avtext-avbsync]

Aidan Williams
aidan.williams@audinate.com

Next steps from IETF82

- Suggested approach was:
 - Use NTP format timestamps
 - Can use RFC 6051 for timing metadata
 - Develop SDP description of clock domains
 - Combine with IDMS SDP description of clock domains
 - See draft-williams-avtcore-clksrc
 - Develop SDP signaling for AVB QoS
 - Part of a draft describing how to use RTP with AVB, referring to the above documents
