RSVP-TE Extensions for Collecting SRLG Information

CCAMP WG, IETF 83rd, Paris, France

`draft-zhang-ccamp-srlg-fa-configuration-05.txt`

Fatai Zhang (zhangfatai@huawei.com)
Dan Li (danli@huawei.com)
Oscar Gonzalez de Dios (ogondio@tid.es)
Cyril Margaria (cyril.margaria@nsn.com)

Changes from 04

- Aim of changes:
    - Limit the document to how to collects SRLG information via RROs (see minutes of 81st and 82nd IETF CCAMP meetings).

- Name change:
    - "RSVP-TE Extensions for Collecting SRLG Information" to reflect better the aim of the draft.

- Format of the document re-visited: XML version available

- Introduction and abstract re-worded

Changes from 04

- Abstract:
  - Focus only on SRLG collection

- Introduction
  - Limit motivation SRLGs
  - Added references to SRLG RFCs
  - Removed references to configuring FAs

Open points

- Include when SRLG collection flag is meaningful:
  - Meaningful on a Path message
  - Not Meaningful on a Resv message
  - Meaningful in the RRO Attribute subobject

Next Steps

- Adopt it as a WG document

- **Continue refining the document** according to the feedback from the meeting or mailing list
