Dirk Kutscher  
Richard Yang

IETF 83, March 2012

<http://tools.ietf.org/html/draft-ietf-decade-arch-05>

# Status (1/2)

- Rev-04 was reviewed by Carsten Bormann (Apps Area Review) and Dave Harrington (AD Review)
- Many good comments given (~ 100 comments)
- Rev-05 addresses majority of comments but some are still open

# Status (2/2)

- Remaining open issues from Carsten Bormann:
  - Further clarify what is prescriptive (normative) vs. descriptive (informative) in the document
  - Fully define all terms/entities/objects
  - Answer open questions on “token” approach
  - Various editorial issues
  
- Remaining open issues from Dave Harrington:
  - Specify a mandatory to implement data protocol (as well as data block sizes, etc.) for interoperability
  - Further clarify reference to terms such as “native protocol”, “data model”, “location”, etc.
  - Various editorial issues (also Dave has some comments that overlap with Carsten’s comments above)
