

# INSIPID

## Session Initiation Protocol (SIP) Extension for logging and debugging (draft-kaithal-dispatch-sip-log- information-00 )

March 26<sup>th</sup> 2012

IETF -83 meeting

Authors: Adarsh Kaithal, Sandeep. K S

Presenter: R Parthasarathi

# Agenda

- To discuss the Log-Me header use case along with Session-id
- Next Step

# Log-me Header intention

- Intention is to log SIPCLF messages in all SIP devices during the session
- SIPCLF with session-id (dialog-id) will serve the purpose to collect the session in all the SIP devices
- “Log-me” header is used to enable the logging mechanism in each SIP devices dynamically.

# Next steps

- Request for Considering “Log-me” logging requirement as a usecase for INSIPID (Session-id) solution.
