

Multicast Filtering Practices

IETF83, Paris

Tim Chown, Lenny Giuliano

Updates since -01

- Lenny joined as co-author
- Split text into two parts
 - Discussion of policies
 - Observed/reported practices from community
- Added text from Lenny on general discussion of policies
 - This included non-filtering issues

Next steps

- Where to go now?
- Not yet a WG item (as far as I'm aware!)
- Personal view:
 - Would be nice for WG to adopt draft
 - Then use the text as a basis to produce a BCP on “multicast hardening”
 - Further observed practices/reports welcome
 - Further co-authors welcome
