

Recommendations for filtering ICMP messages

(draft-ietf-opsec-icmp-filtering-03)

F. Gont, G. Gont, C. Pignataro

IETF 83
Paris, France. March 25-30, 2012

Overview

- This I-D provides advice on the filtering of ICMP/ICMPv6 messages
- For each message type/code, we discuss:
 - Uses
 - Message Specification
 - Threats
 - Operational Impact if blocked
 - Advice

Progress made so far

- Initial individual version originated years ago
- Progress had been stalled, but we made up our minds to finish it ;-)
- Current version covers most ICMP/ICMPv6 messages
- Currently working on a rev to address feedback received on the opsec mailing-list

Moving forward

- Additional reviews would be helpful
- Document ready for WGLC after next rev?

Feedback?
