

Extended Attributes

RADEXT - IETF 83

Alan DeKok
FreeRADIUS
Avi Lior
Bridgewater

TO DO

- Finish document based on reviews (Leaf)
- Add Diameter Considerations Section

Diameter Considerations (1)

- Proposal - just carry RADIUS
- No new attribute allocations in Diameter
- Carries RADIUS as-is
- Pro: compatible with all existing solutions
- Con: potentially ugly

Diameter

Considerations (2)

- Proposal - allow re-encoding
- Allocate new attribute space in Diameter
 - 241.* --> 32-bit Diameter TLV
 - Pack fragmented attrs into one Diameter TLV
- Pro: more “diameter” like
- Con: less compatible
