CUSAX: Combined Use of SIP and XMPP draft-ivov-xmpp-cusax (1/3)

- Double stack clients SIP+XMPP clients
- Connect simultaneously to SIP and XMPP infrastructure
- Use SIP for audio/video conversations
- Use XMPP for everything else:
  – IM, Presence, File transfer, etc.

- Please review!

CUSAX: Combined Use of SIP and XMPP draft-ivov-xmpp-cusax (2/3)

- Similar to SIXPAC but:
  - Does not introduce new SIP headers
  - Does not add new stanza
- Use XMPP for everything else:
  - IM, Presence, File transfer, etc.
- Retrieve SIP AORs from VCARDs
- Retrieve JIDs from additional Contact headers

CUSAX: Combined Use of SIP and XMPP
draft-ivov-xmpp-cusax (3/3)

- Thoughts?

- Is the XMPP WG OK to continue this?
