# IETF 84: FedFS Update

Tom Haynes

[thomas@netapp.com](mailto:thomas@netapp.com)

# Overview

- RFC 6641 - Using DNS SRV to Specify a Global File Name Space with NFS version 4
- Administration Protocol for Federated Filesystems
  - All AIs from first round of WG Last Call done
  - New AI from external review of document
- NSDB Protocol for Federated Filesystems
  - Working on AIs from first round of WG Last Call
- AD wants both submitted at the same time

# Plan to get it out.

- Momentum had stalled
- Formed a editing team of Tom, Chuck, Rob, and Andy
  - Discussions are primarily on the WG alias
- Worked our way through the first document
- Working on security concerns addressed in both documents
  - Getting a lot of help from Nico
