

# ForCES InterFE LFB

*Damascene Joachimpillai (DJ)*

- **This is not part of the current charter of the ForCES WG (Fi Interface)**
- **Proposing it to be part of the ForCES charter for completeness**
- **Provides a much needed programmable interface between disparate Forwarding Engines for service orchestration**

- **Uses a slightly modified packet format. New format includes**
  - NEID
  - Destination FEID
  - Source FEID
  - Other Application Specific Metadata
  - Redirected Data TLV
- **Initial implementation is only targeted at Ethernet**
