Note Well

Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

- * The IETF plenary session
- * The IESG, or any member thereof on behalf of the IESG
- * Any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices
- * Any IETF working group or portion thereof
- * The IAB or any member thereof on behalf of the IAB
- * The RFC Editor or the Internet-Drafts function

All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879).

Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice.

Please consult RFC 5378 and RFC 3979 for details.

A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

4. Use of NETCONF in Open Networking Foundation Config-Mgmt WG. Juergen Quittek - ONF Config-Mgmt WG Vice Chair (10min.)

WG Status (since Vancouver)

- After a longish discussion we got rechartered on 9/9/12:
 - <http://tools.ietf.org/wg/netconf/charters?item=charter-netconf-2012-09-20.txt>
- Two focus items:
 - Advance NETCONFoverTLS to be in-line with NETCONF 1.1
 - Based on the implementation, deployment experience and interoperability testing, the WG will produce a NETCONF status report.
 - The result may be clarifications for RFC6241 and RFC6242 and addressing any reported errata.
 - The interoperability testing took place during the weekend before IETF 85
 - After that we might ask our AD to advance the NETCONF RFCs to the standard level.

WG Status (since Vancouver) ctd.

- draft-badra-netconf-rfc5539bis became a WG item.
 - now available as [draft-ietf-netconf-rfc5539bis-01](#)
 - We had a WGLC for v-00 and solved different issues.
 - Harmonization of the YANG module with [draft-ietf-netmod-snmp-cfg](#) needs yet to be done.
- The discussion on operational state started already in IETF 84:
 - After some discussion on the maillist a draft is available as input for discussion: [draft-bjorklund-netmod-operational](#)
 - We had the first part of the discussion already yesterday in the NETMOD session, which will be continued today.
