BGPSEC Protocol

draft-ietf-sidr-bgpsec-protocol-06

Matt Lepinski

Status

- Received great reviews on the -05 version
  - Thanks Randy, Wes, Sandy, Rob, and Sean
- Interim meeting in September following RIPE
- Confirmation on the list following discussions following the Interim meeting
- -06 version incorporates discussions at the interim meeting
- No known open technical issues
  - Several small editorial changes in the queue
  - Waiting on requirements / threats docs

Pointers

- Interim Meeting Slides: http://www.ietf.org/proceedings/interim/2012/09/29/sidr/proceedings.html

- Changes in light of interim discussions: http://www.ietf.org/mail-archive/web/sidr/current/msg05141.html

For Possible List Discussion

- From -05 to -06 I removed the Additional_Info from the BGPSEC_PATH attribute
- Feedback at the interim was that the -05 Additional_Info was not a useful extension mechanism
- If you think we need an “improved” extension mechanism, please post to the SIDR list
