Matt Hartley	**Cisco Systems**
Kenji Kumaki	**KDDI Corporation**
Rüdiger Kunze	**Deutsche Telekom AG**
George Swallow	**Cisco Systems**

Metric Recording

- Latency and latency variation have been identified as critical metrics

  e.g. in financial networks [draft-ietf-ospf-te-metric-extensions], [draft-previdi-isis-te-metric-extensions].

- In inter-domain or GMPLS overlay networks,

  ➢ Ingress node may not know route of a uni-directional (FA) LSP.

  ➢ Ingress and egress nodes may not know route of a bi-directional (RA) LSP.

- Endpoints of an FA or RA need to advertise these in client layer IGP

Changes from -00

- Accepted as WG document
- v-01 minor text improvements

Next Steps

- Consider draft nearly ready for last call

- Solicit comments on list

- Plan an editing pass

- May move draft-previdi-isis-te-metric-extension to informative references if not adopted at this meeting

  ➢ No normative reference is necessary

  ➢ Will discuss this point with the chairs

- Ask for last call before Berlin
