Definition of Managed Objects for Battery Monitoring

draft-ietf-eman-battery-mib-08

T. Dietz, J. Quittek, R. Winter

08 changes

- Most issues raised on the mailing list solved
  - E.g. changed Unsigned64 to Unsigned64TC from RFC2564
  - Typo fixes and other edits

Reminder... Open issues

- Voltage and temperature per cell?
  - It would require a cell table
- Notifications for removable batteries
- Notification for battery charging state changes
- Support for ACPI critical battery state
  - We already have batteryLowNotification

Next steps

- Now that the entity MIB is done, change the battery MIB to reflect these changes
- Close the open issues
- Few minor edits
