
ForCES Packet Parallelization

IETF – 86 Atlanta

Evangelos Haleplidis (ehalep@ece.upatras.gr)

Joel Halpern (jmh@joelhalpern.com)

Clarification

- What does COPY of a packet mean in flood:
 - Physical copy.
 - Logical copy (e.g. passing only pointers to the same packet).
 - Need to take necessary interlocks.
 - What does SPLIT of a packet mean in split:
 - Physical split.
 - Logical split (e.g. passing pointers to specify the part of the packet for processing per parallel path)
 - Need to take necessary interlocks.
-

Conclusion

- Request to be added to the charter and as working group item.
