# A YANG Data Data Model for Routing Management

draft-ietf-netmod-routing-cfg-09

Ladislav Lhotka

⟨*lhotka@nic.cz*⟩

12 March 2013

# Changes since IETF 85

Very few changes overall.

- Title has changed: "Configuration" was replaced with "Management".

- Types have been adapted to 6021bis (`yang:dotted-quad`).

- New typedefs `routing-table-ref` and `route-filter-ref`.

- Several mistakes in XPath expressions were corrected.

- Text clarifications.

# Status

There are no open issues.

This I-D is now coupled with RFC6021bis, so both documents has to be advanced together.
