

OAuth JWT Status

Mike Jones

March 14, 2013

IETF 86

JSON Web Token (JWT)

- Specification quite stable
 - Signature functionality unchanged since January 2011
 - Well over a dozen known implementations
 - Some in production use
 - Significant interop testing has already occurred
- No open issues
 - No changes anticipated other than tracking JOSE
- JOSE plans WGLC on specs within a few months
 - Our WGLC should probably be synced with JOSE WGLC
