A Usage for Shared Resources in RELOAD (ShaRe)

draft-ietf-p2psip-share-01

Thomas C. Schmidt
t.schmidt@ieee.org

Reminder

o ShaRe organizes controlled access to RELOAD resources that are shared among peers

o ShaRe is built on access control lists that provide the option of trust delegation

o ShaRe also allows for configuration of variable resource names – (enable common names, but avoid conflicts)

Status of the Draft

o draft-ietf-p2psip-share-00

- WG draft from fairly stable work

- Review by Marc pointed to additional issues

o draft-ietf-p2psip-share-01 update Feb. '13
