

# NAI, Exten, DTLS

RADEXT - IETF 86

# NAI

- Updates from Jim Schaad and Bernard Aboba
- The NAI is for identifying users anywhere
- not just RADIUS and Diameter
- The hope is most authentication protocols will use it
- Notes on transport in other protocols

# Exten

- Many minor updates from IESG, appdir, gen-art reviews
- Cleanups, consistency, ambiguities

# DTLS

- Session resumptions as per 5077
- References to 6520
- Cleanups and checks against 6615 (R / TLS)

Discussion?
