

# **DS-Lite Management Information Base (MIB)**

**draft-ietf-softwire-dslite-mib**

*Yu Fu(presenter)*

*Sheng Jiang*

*Jiang Dong*

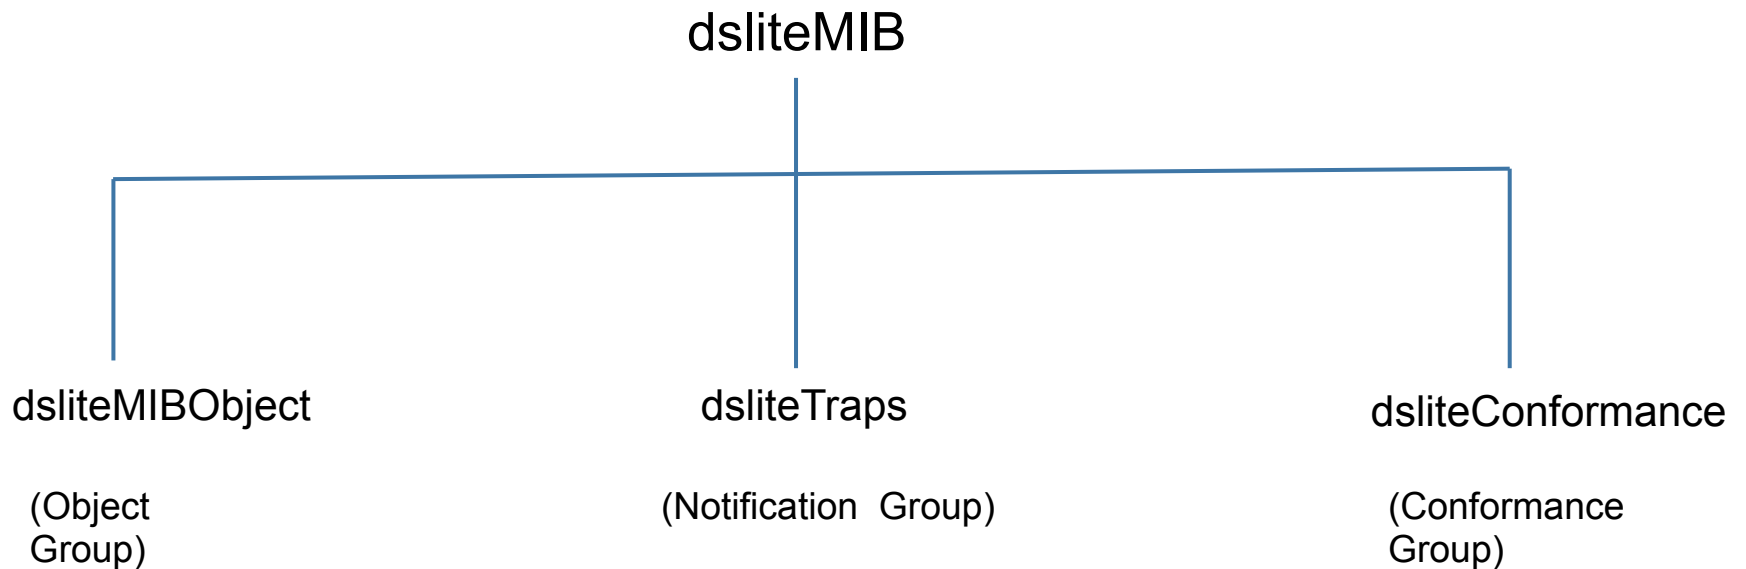

*Yuchi Chen*

# Background

- **We need DS-Lite MIB to map the information between Tunnel and NAT**
- **draft-ietf-softwire-dslite-mib was adopted as softwire WG item on July 2012(Vancouver meeting)**
- **Some comments have been received on the mailinglist**
- **We have updated 02 version based on Chair's comments**

# Main Changes

**(1) The top level division of DS-Lite MIB are separated into objects, notification, and conformance to follow the recommended style.**

# Main Changes

**(2) Redefine some objects in dsliteNATMapTable and dsliteNATBindTable which cannot be imported from NAT MIB.**

**(3) Correct some syntax errors by using a MIB validator and also compiled it by the MG-SOFT MIB Compiler.**

**Comments and suggestions are welcome!**

**Moving Forward?**

**Thank you !**
