

draft-roach-dime-overload-ctrl

Update for IETF 87

Changes

- Reference updates and additions
- Requirements Analysis
 - Added in 02 version (Appendix B)
- Requirements Compliance
 - In 03 version

Open Issues

- Scopes
 - Origin-Host
 - Host
 - Session
 - Session Group
 - Mandatory scopes
 - Which (if any) should be?

Open Issues

- Non-adjacent overload control
- Default algorithm (drop or rate)
- Naming (confusion on AVP names)

Next Steps

- Progress open issues discussions
- Explore details of use cases and evaluate against mechanism
- Focus working group efforts
- Time to adopt
 - Meets all but one requirement
 - Version at 3
 - Good feedback
 - Ongoing discussions (including pulling in concepts from other drafts)
