ENERGY-OBJECT-CONTEXT-MIB
draft-ietf-eman-energy-aware-mib-09

John Parello, Benoit Claise**,** Mouli Chandramouli

87 IETF Meeting, Berlin 2013

Summary of Major Changes in 09

- New IANA maintained Energy relationship TC
  - IANAEnergyRelationship
  - IANA considerations for adding new relations

- Removed ProxyRelationship
  - Removed eoProxyTable

- Editorial comments
  - Thanks to Alan Luchuk review

```
IANAEnergyRelationship ::= TEXTUAL-CONVENTION
      STATUS          current
      SYNTAX      INTEGER  {
            poweredBy(1),   --  power relationship
            powering(2),
            meteredBy(3),   --  meter relationship
            metering(4),
            aggregatedBy(5), -- aggregation relationship

            aggregating(6)
            }
```

- A Specification Required as defined in RFC 5226 [RFC5226], is REQUIRED for each modification of the energy relationships.

- Proposal: Keep the IANA considerations and TC representation

Next steps

- Closed all open issues

- Waiting for Requirements draft and Framework draft to complete to Last Call
- Must still check if all the requirements are covered.

- Pending Issue
- Name of MIB Module - ENERGY-CONTEXT-MIB
- Draft name - draft-ietf-eman-energy-aware-mib-09
- should be consistent – can be done at during LC ?
