Use Case Overview

Use Case Overview

- **Characteristics**
 - Passive and active measurements.
 - Network device states are required.
 - Metrics above layer 3 are not required.
 - Frequency of passive measurements should be adjusted.
 - Synchronization between MAs are required.
- **Difference from other use cases**
 - It's not dedicated for certain services (e.g., VoIP), usages (e.g., troubleshooting) or users.
 - Instead, it's for a common platform which is expected to deal with all services, usages and users.

Next Step

- Is it a reasonable use cases?
- If yes, does it fit the scope of LMAP?
