

IODEF extensions for structured cybersecurity information

draft-ietf-mile-sci-08.txt

Takeshi Takahashi (NICT), Kent Landfield (McAfee),
Thomas Millar (US-CERT), Youki Kadobayashi (WIDE/NAIST)

Changes made after the Orlando meeting in March

- MMDEF was chosen as a MTI
- Exchanged emails with the authors of MMDEF
 - They agreed to paste the entire schema with proper notes
 - They preferred to have only links instead of pasting the entire schema, if possible, though
- 08 version was released on 4th Jul
 - MMDEF's schema was added to the draft
 - Tools that generate, store, and locate IODEF-SCI documents (08 version) were also built
- Last call ended on 27th July
 - The reference URL field of MMDEF will be changed, as discussed on the mailing list
