Jabber: stox@jabber.ietf.org

Note well

Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

– the IETF plenary session,

– any IETF working group or portion thereof,

– the IESG or any member thereof on behalf of the IESG,

– the IAB or any member thereof on behalf of the IAB,

– any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices,

– the RFC Editor or the Internet-Drafts function

All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879). Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult RFC 5378 and RFC 3979 for details.

A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

Status update

- ## STOX Formed June 14.
  - The STOX WG in the RAI area is chartered to discuss and define protocol mappings between SIP and XMPP, that would make it easier for implementers to enable interworking between SIP-based and XMPP-based systems.

- ## June 19: Consensus call on adopting the current drafts as WG documents

- ## July 1: Drafts accepted as WG documents:
  - draft-ietf-stox-core-00
  - draft-ietf-stox-presence-00
  - draft-ietf-stox-im-00
  - draft-ietf-stox-chat-00
  - draft-ietf-stox-groupchat-00
  - draft-ietf-stox-media-01

- Draft reviews timeline suggested

Preliminary Timeline on Draft Review Deadlines

Forthcoming Milestones

<u>August 2013</u>
- Looking for reviewers
- Discuss open issues
- Review deadline on drafts: draft-ietf-stox-core-00, draft-ietf-stox-presence-00, draft-ietf-stox-im-00, draft-ietf-stox-chat-00
- Define last calls deadlines

<u>Sept - Oct 2013</u>
- Review deadline on drafts: draft-ietf-stox-groupchat, draft-ietf-stox-media

<u>IETF 88</u>

Meet if there is interest to discuss about re-chartering, i.e. adding new WG items.

Principles

- In the current set of documents, only include features or methods that
  - Have stable specifications in either IETF or XSF. In IETF this means in practice a published RFC.
  - Have some amount of real implementation and deployment.
- New functionality introduced through separate extension documents (not on current charter)
  - Relevant especially to "media signaling" topic where new work is currently in progress in both IETF and XSF (trickle-ICE, bundle, unified-plan)
