# Agenda

- Note Well
- Agenda Bashing
- Working Group Document Status
- Non-Working Group Documents of interest
- S-BFD
- WGLC Open Commentary

# Note Well

This summary is only meant to point you in the right direction, and doesn't have all the nuances. The IETF's IPR Policy is set forth in BCP 79; please read it carefully.

## The brief summary:

- ❖ **By participating with the IETF, you agree to follow IETF processes.**
- ❖ **If you are aware that a contribution of yours (something you write, say, or discuss in any IETF context) is covered by patents or patent applications, you must disclose that fact.**
- ❖ **You understand that meetings might be recorded, broadcast, photographed, and publicly archived.**

For further information, talk to a chair, ask an Area Director, or review the following:

BCP 9 (on the Internet Standards Process)

BCP 25 (on the Working Group processes)

BCP 78 (on the IETF Trust)

BCP 79 (on Intellectual Property Rights in the IETF)

# WG Document Status (1)

- Three documents are currently in Working Group Last Call, which ends on Nov. 8:
  - draft-ietf-bfd-on-lags-01
  - draft-ietf-bfd-mib-14
  - draft-ietf-tc-mib-02
- The WG chairs are shepherding these documents.
- Carlos Pignataro has volunteered to gauge WG consensus.

# WG Document Status (2)

- draft-ietf-bfd-mpls-mib
  - Needs additional WG input
  - Are there implementations in progress?
- draft-ietf-bfd-generic-crypto-auth
- draft-ietf-bfd-hmac-sha
  - Awaiting implementations to progress documents.

# WG Document Status (3)

- draft-ietf-bfd-multipoint
  - Document has been stable.
  - ALU has an implementation of silent tails.
  - Other vendors have implementations in progress, also with silent tails.
- Active tail feature does not currently seem to be getting traction. Should the draft be simplified to permit it to progress?
  - One of the authors doesn't think so. 😊

# Non-WG Documents of Interest

- draft-akiya-bfd-intervals
  - Document will not be seeking to become normative. Perhaps adopt and make informational?
- draft-mbind-bfd-redundancy
  - Received some list discussion. Authors are not going to progress it?
- draft-vgovindan-l2vpn-evpn-bfd
  - Will be presented in L2VPN on Friday. Authors may wish to present it next IETF session in BFD.

S-BFD

# WGGLC Open Commentary

- Thus far, the only commentary on documents in WGGLC has been clarification on the BFD on LAG procedure for determining interfaces for its matching procedure.
- Open time at the mic for anyone wishing to comment on documents in last call.
