Separation of Control and User Plane for Proxy Mobile IPv6

IETF 88

Ryuji Wakikawa
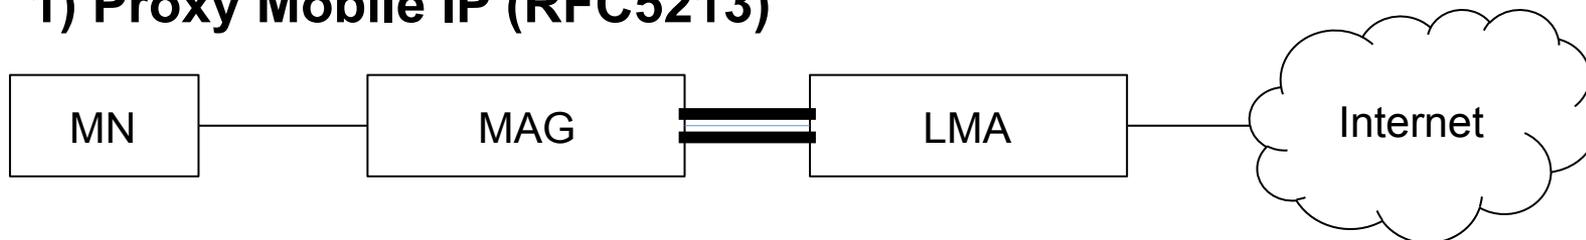

Rajesh S. Pazhyannur

Sri Gundavelli

Charlie Perkins
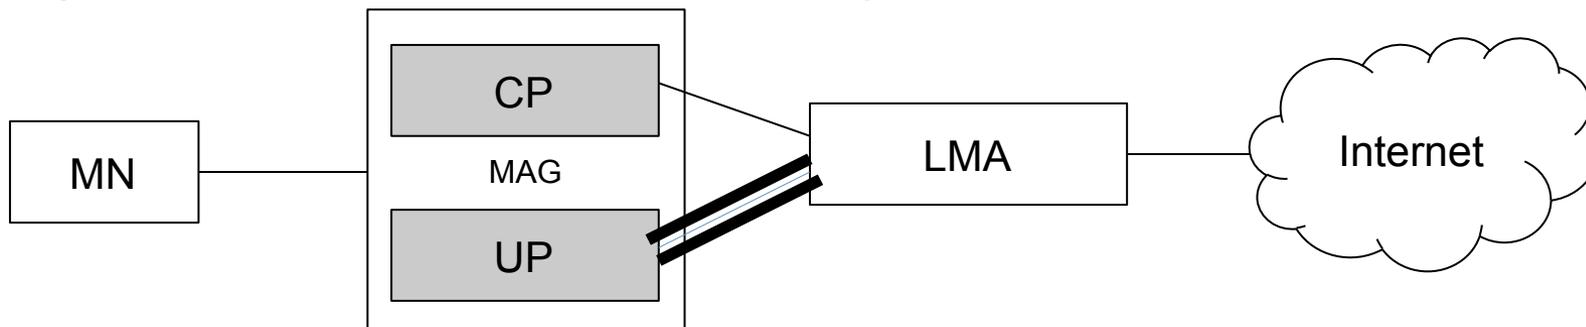

Motivation

1) Proxy Mobile IP (RFC5213)

Needed: user-plane and control plane separation between MAG and LMA

2) Can use Alternate CoA mobility option for separation at MAG

Need separate user plane connection between MAG and LMA

- **3) LMA User Plane Address Mobility Option**
  - ➢ **A new message is needed to enable separation at LMA.**
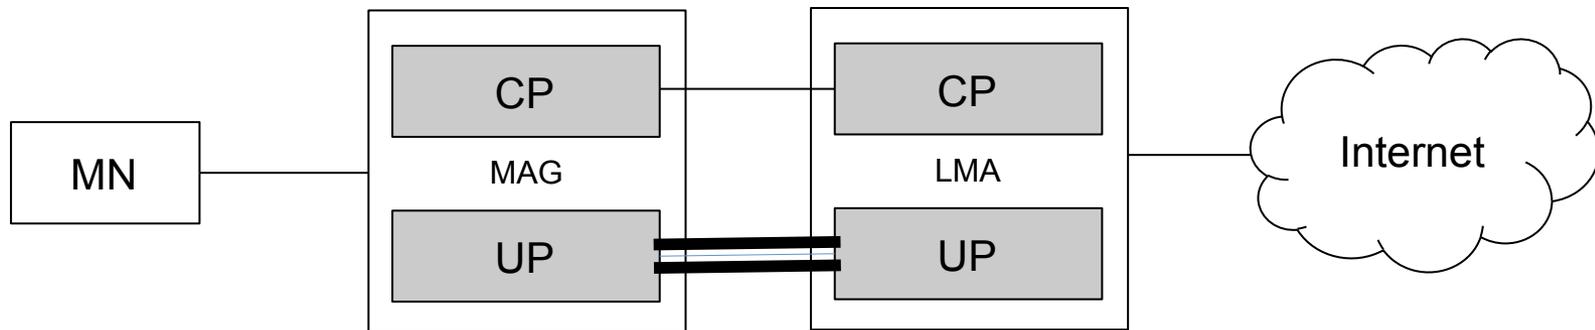

Use Cases: Service Provider WiFi

"WLC": Wireless LAN controller

MN

WLC/MAG — LMA — Internet

MN

WLC/MAG

Using Alt-CoA

LMA

Internet

MN

WLC/MAG

LMA

Router

Internet

Also using new LMA option

LMA User Plane Address Mobility Option

Next Steps

- Currently netext working group draft (thanks!)
- There is good support on mailing list.
- An editorial revision will be submitted by next week
- If there are no technical issues, will be ready for last call afterwards.
