

SNMP engine configuration

draft-ietf-netmod-snmp-cfg-03

IETF 88

Martin Björklund

mbj@tail-f.com

Jürgen Schönwälder

j.schoenwaelder@jacobs-university.de

Current Status

-03 posted yesterday.

Based on the IETF LC comments on draft-ietf-netmod-interfaces-cfg regarding the simultaneous implementation of YANG models and corresponding SNMP MIBs, we need to address the same questions in this document.

NETCONF: persistency is a property of the datastore

SNMP: persistency is a property of each table row
(StorageType)

In -03, we describe the implementation challenges, but do not try to provide a recommended solution.
