perpass BoF – Handling Pervasive Monitoring in the IETF

Stephen Farrell/Sean Turner

stephen.farrell@cs.tcd.ie/turners@ieca.com

List: https://www.ietf.org/mailman/listinfo/perpass

Goals

- The primary goal of the session is to identify and plan for concrete IETF activities (e.g. new standards track documents or BCPs) that help mitigate pervasive monitoring

  – As a secondary goal we also want to figure out how to use perpass list after Vancouver

- Non-goal: bash any particular people or agencies

  – Treating actions as attacks (if they are) is fair game

  – Saying "[Govt X|person Y] is bad" is not ok

Your ADs are here to help

- If you have a good proposal for improving security and privacy in this space then bring that to any area director – they've all agreed they'd welcome such proposals and are happy to facilitate work on 'em

  – And I checked:-)

Agenda

minutes - topic

0000 - intro, agenda bash - chairs

0010 - overview pressie - Dave Thaler

0040 - open mic, have we level-set?

0060 - threat model - Brian Trammell

0070 - hard and open topics - Phillip Hallam-Baker

0080 - high level on more use of tls - Mark Nottingham

0090 - privacy bcp - Alissa Cooper

0100 - open mic, comments on pressies, what's missing?

0120 - summarise actions, open-points, Scott Brim

- Scott will try to draft a plan based on what he hears at the meeting, then present that here.

0150 - end
