IETF 89 March 2-9, 2014 - London

Summary of changes from -01 to -02

- MULTI_TOPOLOGY_ID

- rpf-check-interface

- Inter-domain extensions to RIB

- Optimized exit control

Nexthop content update

Removed ambiguous example associated with the "address" option

Made text clear by adding separate options
- interface+IP address
- interface+MAC

Updates to load-balancing

Nexthop weight

- Was <u>percentage</u> number

- Now it is a proportion of the total weights.

Future work plans

Capability modeling

Modeling language change

Separate draft on routing-policies

Split use-cases to separate draft(s)

Write applicability drafts for use-cases
