

# MPVD Architecture status update

Hui Deng,

Dmitry Anipko

July 22 2014, IETF 90

Draft-ietf-mif-mpvd-arch-02 published and in WGLC since July 03, 2014.

Notable changes since IETF 89:

1. An option for implicit PvDs with scope, different from the interface – section 2.3.
2. Application of PvDs to listening endpoints – section 5.2.3.
3. Relationship to VPN/split tunneling behavior – section 5.2.4.
4. Examples of traffic, using preferences and requirements for connection selection – section 6.2.
5. Description of 3 network configurations and use of PvDs – a mobile node, a node with a VPN connection, a home network and an ISP with multiple services (thanks to Zhen Cao, Ian Farrer and Dapeng Liu for their contributions) – section 4.1.

Working on the comments from the WGLC, will publish -03 after the IETF 90 meeting.

Due to the IETF 90 meeting, WGLC extended till July 25 –

Please read the draft and send your comments.
